

# KNOW THE DIGITAL DANGERS

## **PARENT PRESENTATION THURSDAY, MARCH 15, 6:30 PM FREEDOM INTERMEDIATE SCHOOL THEATER**

Parents, guardians and extended family are all invited to a special presentation by Homeland Security Investigations (HSI) Special Agent/Group Supervisor Dennis Fetting, who will share the benefits, risks and consequences of children accessing the internet through a variety of devices. Agent Fetting will use actual examples of cases his office has worked on to provide incredible insight into the importance of staying plugged in to what your children are doing online. By understanding real-life experiences of families who have been impacted by online predators through gaming systems and smartphone or device apps designed for secrecy, parents and caregivers will be better equipped to prevent children from becoming victims.

This Parent Session will occur before all student sessions so families can engage in conversations prior to the student presentations. Please note that the parent session will include content that is not suitable for children, so please plan accordingly. For more information, please contact Cindy Cook at 615-472-3115 or [cookcin@fssd.org](mailto:cookcin@fssd.org).

# DIGITAL DANGERS STUDENT PRESENTATIONS

The content of the Digital Dangers student presentations will be more tailored to the age group of each class as opposed to the parent presentation on March 15. Students will learn more about how online predators use specific popular apps and gaming systems to find victims and how they can protect themselves from these dangers. Parents and guardians are welcome to attend if desired.
